Vue JS, React JS  
jQuery, Bootstrap

## Tools

Git, Linux

## Design Tools

Adobe Xd, Adobe Photoshop

## Job Experiences

### Team Lead, Senior Front-End Developer, UI/UX Designer at FANAP Co

April 2017 - Present

As a team lead, I am responsible for Fanap's Messaging Platform, Pobel, Talk and HMI projects. As a senior Front-end developer I'm working on multiple projects right now and my job is mostly developing JavaScript these days. Every now and then I design UX and UI for some projects.

- Developing Client Application of Pobel (Fanap's Data Labeling Project), a crowdsourcing AI based application to label images, sounds and text. The idea is similar to Common Voice Project of Mozilla, but has greater vision. *(Vanilla JS, HTML, CSS)*
- Developing Talk's Desktop Application. Talk is a Messaging Application build on PodChat (JavaScript SDK of FANAP's Messaging platform). *(ElectronJS, CSS)*
- Developing IOT solutions for Smart City and Smart Traffic Management systems. (<https://github.com/masoudmanson/iot-parking>) *(JavaScript, HTML, CSS)*
- Working on Web based process visualization in order to graphically monitor real time data which comes from sensors through ASYNC server (Socket, HTTP, ActiveMQ, MQTT), The final result is going to be a HMI (Human Machine Interface) software like WinCC (<https://github.com/masoudmanson/pod-hmi>) . *(JavaScript, HTML, CSS)*
- Developing JavaScript SDK of FANAP's Messaging platform (<https://www.npmjs.com/package/podchat>). SDK is developing in pure JavaScript to cover as many cases as possible. Both browser and Node environments are supported. Unit tests have been written with Mocha and Load tests have been developed with NODE JS and are supposed to test SDK with distributed random chat clients. *(JavaScript, NodeJs)*
- Developing JavaScript SDK of FANAP's Async Server (<https://www.npmjs.com/package/podasync>). Socket protocol is currently supported and supporting MQTT protocol is under development. Unit tests have been written with Mocha. *(JavaScript)*
- UX/UI Design and Code implementation of FANAP's payment, and Single Sign On (SSO) pages. *(Adobe Xd, JavaScript, HTML, CSS)*
- UX/UI Design of Playpod's android application. Playpod is FANAP's game center application. *(Adobe Xd, Adobe Photoshop)*
- Developing Kish Island's Tourism Management Portal. *(JavaScript, ReactJs, HTML, CSS)*
- Working on FanEx website as an international exchange system. *(JavaScript, jQuery, HTML, CSS, NodeJs)*

Software design principles and concepts

SaaS, Socket Programming, SDK Development

Management Softwares and Skills

Scrum/Agile Development, SharePoint, Slack, Trello

Qualities

Agile and Fast, Motivated, Eager to Learn, Problem Solver

Languages

English, *Fluent*  
Persian, *Native*  
Azerbaijani, *Native*  
Turkish, *Bilingual Proficiency*
