Job Experiences

Team Lead, Senior Front-End Developer UI/UX Designer at FANAP Co.

April 2017 - Present

As a team lead, I am responsible for **PodChat**, **Pobel**, **Talk** and **HMI** projects. As a senior Front-end developer I'm working on multiple projects as listed below and my job is mostly developing JavaScript. I am also working on UX and UI for some projects.

- Developing Client Application of Pobel (Fanap's Data Labeling Project), a crowdsourcing AI based application to label images, sounds and text. The idea is similar to Common Voice Project of Mozilla, but has greater vision. (*Vanilla JS, HTML, CSS*)
- Developing Talk's Desktop Application. Talk is a Messaging Application build on top of PodChat (JavaScript SDK of FANAP's Messaging platform). (*ElectronJS, CSS*)
- Developing IOT solutions for Smart City and Smart Traffic Management systems. (<https://github.com/masoudmanson/iot-parking>) (*JavaScript, HTML, CSS*)
- Developing HMI as an Web based process visualization Application in order to graphically monitor real time data coming from sensors through ASYNC server (Socket, HTTP, ActiveMQ, MQTT), The final result is going to be a HMI (Human Machine Interface) software like Siemens WinCC. (*JavaScript, HTML, CSS*) (<https://github.com/masoudmanson/pod-hmi>)
- Developing JavaScript SDK of FANAP's Messaging platform (<https://www.npmjs.com/package/podchat>). The SDK is developing in pure JavaScript to cover as many cases as possible. Both browser and Node environments are supported. Unit tests have been written with Mocha and Load tests have been developed with NodeJS. (*JavaScript, NodeJs*)
- Developing JavaScript SDK of FANAP's Async Server (<https://www.npmjs.com/package/podasync>). Web sockets, STOMP Queue and MQTT protocols are supported. Unit tests have been written with Mocha. (*JavaScript*)
- UX/UI Design and Code implementation of FANAP's Payment, and Single Sign On (SSO) projects. (*Adobe Xd, JavaScript, HTML, CSS*)
- UX/UI Design of PlayPod's android application. Playpod is FANAP's game center application. (*Adobe Xd, Adobe Photoshop*)
- Developing Kish Island's Tourism Management Portal. (*JavaScript, ReactJs, HTML, CSS*)
- Developing FanEx web application as an international exchange system. (*JavaScript, jQuery, HTML, CSS, NodeJs*)

About me

Hard working Front-End Developer and UI/UX Designer with 9+ years of well-rounded experience and a flair for creating elegant solutions in the least amount of time.
